|--|-----------|
| <b>Foreword</b> .....  | <b>A</b>  |
| <b>Executive Summary</b> .....   | <b>D</b>  |
| <b>Contextual Discussion</b> .....   | <b>L</b>  |
| <b>1 Introduction</b> .....  | <b>1</b>  |
| 1.1 Importance of platinum group metals .....                                  | 1         |
| 1.2 Consumption and areas of application of PGMs .....                         | 5         |
| 1.3 Price development .....  | 7         |
| 1.4 Production of PGMs from ore and recycling .....                            | 8         |
| <b>2 Terms of reference</b> .....  | <b>17</b> |
| 2.1 Motivation and objectives .....  | 17        |
| 2.2 Prerequisites and general conditions .....                                 | 18        |
| 2.3 Planning and execution of the project .....                                | 20        |
| <b>3 PGM statistics and basic definitions</b> .....                            | <b>24</b> |
| <b>4 Systems analysis of the materials flow of platinum group metals</b> ..... | <b>28</b> |
| 4.1 Industrial catalysts .....   | 28        |
| 4.1.1 Crude-oil refining .....   | 28        |
| 4.1.1.1 Applications and input quantities .....                                | 28        |
| 4.1.1.2 Status of PGM recycling .....  | 29        |
| 4.1.1.3 Assessment of additional recycling potential in Germany .....          | 31        |
| 4.1.1.4 Assessment of market development in Germany up to 2020 .....           | 31        |
| 4.1.2 Nitric acid and hydrocyanic acid production .....                        | 32        |
| 4.1.2.1 Applications and input volumes .....                                   | 32        |
| 4.1.2.2 PGM recycling .....  | 33        |
| 4.1.2.3 Assessment of additional recycling potential in Germany .....          | 34        |
| 4.1.2.4 Assessment of market development in Germany up to 2020 .....           | 35        |
| 4.1.3 Powder catalysts in fine chemistry .....                                 | 36        |
| 4.1.3.1 Applications and input volumes .....                                   | 36        |
| 4.1.3.2 Status of PGM recycling .....  | 36        |
| 4.1.3.3 Assessment of additional recycling potential in Germany .....          | 37        |
| 4.1.3.4 Assessment of market development in Germany up to 2020 .....           | 37        |
| 4.1.4 Fixed-bed und fluidized-bed catalysts .....                              | 38        |
| 4.1.4.1 Applications and input quantities .....                                | 38        |
| 4.1.4.2 Status of PGM recycling .....  | 39        |
| 4.1.4.3 Assessment of additional recycling potential in Germany .....          | 40        |
| 4.1.4.4 Assessment of market development in Germany up to 2020 .....           | 40        |
| 4.1.5 Homogeneous catalysis .....  | 41        |
| 4.1.5.1 Applications and input volumes .....                                   | 41        |
| 4.1.5.2 Status of PGM recycling .....  | 42        |
| 4.1.5.3 Assessment of additional recycling potential in Germany .....          | 44        |
| 4.1.5.4 Assessment of market development in Germany up to 2020 .....           | 45        |
| 4.1.6 Environmental catalysts .....  | 45        |

|         |   |     |
|---------|---|-----|
| 4.1.6.1 | Applications and input quantities .....                           | 45  |
| 4.1.6.2 | Status of PGM recycling .....                                     | 47  |
| 4.1.6.3 | Assessment of additional recycling potential in Germany .....     | 47  |
| 4.1.6.4 | Assessment of market development in Germany up to 2020 .....      | 48  |
| 4.1.7   | Summary: industrial catalysts .....                               | 49  |
| 4.2     | Automotive catalytic converters .....                             | 50  |
| 4.2.1   | Overview of the end use .....                                     | 50  |
| 4.2.2   | Significance for PGM demand .....                                 | 52  |
| 4.2.3   | Recycling chain and legal framework .....                         | 56  |
| 4.2.4   | Status of recycling and potential .....                           | 59  |
| 4.2.4.1 | Methodology and interpretation of statistics .....                | 59  |
| 4.2.4.2 | Results of field analysis for scrap-car catalysts .....           | 64  |
| 4.2.4.3 | Replaced catalysts .....  | 68  |
| 4.2.4.4 | PGM volumes in auto catalysts .....                               | 69  |
| 4.2.5   | System flows and losses .....                                     | 76  |
| 4.2.5.1 | PGM losses prior to the recycling chain .....                     | 77  |
| 4.2.5.2 | PGM losses within the recycling chain .....                       | 80  |
| 4.2.5.3 | Verification of the plausibility of losses .....                  | 82  |
| 4.2.6   | Summary and proposals for improvements .....                      | 83  |
| 4.3     | Electronics .....   | 91  |
| 4.3.1   | Brief description of application .....                            | 91  |
| 4.3.2   | Significance of PGM consumption in Europe and worldwide .....     | 96  |
| 4.3.3   | PGM input volumes in Germany .....                                | 98  |
| 4.3.4   | Status of PGM recycling in Germany .....                          | 107 |
| 4.3.5   | Assessment of additional recycling potential in Germany .....     | 111 |
| 4.3.6   | Assessment of market development in Germany up to 2020 .....      | 112 |
| 4.4     | Electroplating .....  | 114 |
| 4.4.1   | Electroplating technology .....                                   | 114 |
| 4.4.2   | Applications and input quantities .....                           | 114 |
| 4.4.2.1 | PGMs remaining in products .....                                  | 115 |
| 4.4.2.2 | PGMs remaining in electrolyte baths .....                         | 115 |
| 4.4.3   | Status of PGM recycling .....                                     | 116 |
| 4.4.4   | Materials flow of PGM .....                                       | 117 |
| 4.4.5   | Assessment of additional recycling potential in Germany .....     | 118 |
| 4.4.6   | Assessment of market development in Germany up to 2020 .....      | 119 |
| 4.5     | Glass industry .....  | 121 |
| 4.5.1   | Short description of the application .....                        | 121 |
| 4.5.2   | Significance of PGM consumption worldwide and in Europe .....     | 123 |
| 4.5.3   | Input quantities and the status of PGM recycling in Germany ..... | 124 |
| 4.5.4   | Assessment of additional recycling potential in Germany .....     | 125 |
| 4.5.5   | Assessment of market development in Germany up to 2020 .....      | 125 |
| 4.6     | Dentistry .....   | 126 |
| 4.6.1   | Overview of the end use .....                                     | 127 |
| 4.6.2   | Significance for PGM consumption worldwide and in Europe .....    | 129 |
| 4.6.3   | Input quantities and the status of PGM recycling in Germany ..... | 131 |
| 4.6.4   | Assessment of additional recycling potential in Germany .....     | 135 |
| 4.6.5   | Assessment of market development in Germany up to 2020 .....      | 135 |
| 4.7     | Jewellery .....   | 138 |
| 4.7.1   | Overview of the end use .....                                     | 138 |
| 4.7.2   | Jewellery's Significance for European and Global PGM Use .....    | 139 |
| 4.7.3   | Demand and the status of PGM recycling in Germany .....           | 141 |

|          |   |            |
|----------|---|------------|
| 4.7.4    | Recycling potential in Germany.....   | 144        |
| 4.7.5    | Assessment of market development in Germany up to 2020.....                                 | 144        |
| 4.8      | Fuel cells.....   | 146        |
| 4.8.1    | Introduction.....   | 146        |
| 4.8.2    | Vehicles.....   | 146        |
| 4.8.2.1  | Scenarios of the market introduction and market share of fuel cell vehicles up to 2020..... | 146        |
| 4.8.2.2  | Estimates of the probable quantity of platinum in car fuel cells.....                       | 150        |
| 4.8.3    | Portable equipment (focus: laptops).....  | 150        |
| 4.8.4    | Electricity production using fuel cells for fixed-site energy generation.....               | 153        |
| 4.9      | Other industrial applications.....  | 156        |
| 4.10     | Investments/Stocks.....   | 159        |
| <b>5</b> | <b>Results and conclusions.....</b>   | <b>160</b> |
| 5.1      | Summary of the data.....  | 160        |
| 5.2      | Deficit analysis.....   | 166        |
| 5.3      | Summary of recycling potential.....   | 173        |
| 5.4      | Recommendations for system optimization.....  | 178        |
| <b>6</b> | <b>Scenarios for materials flow of PGMs up to 2020.....</b>                                 | <b>182</b> |
| 6.1      | Description of the scenarios.....   | 182        |
| 6.1.1    | Scenario assumptions.....   | 182        |
| 6.1.2    | Methods and Database.....   | 184        |
| 6.2      | Results of the scenarios.....   | 188        |
| 6.2.1    | Materials flow of PGMs.....   | 188        |
| 6.2.1.1  | Reference Scenario.....   | 188        |
| 6.2.1.2  | Closed-cycle Scenario.....  | 193        |
| 6.2.1.3  | New Markets Scenario.....   | 195        |
| 6.2.2    | Environmental effects.....  | 199        |
| 6.2.2.1  | Reference Scenario.....   | 199        |
| 6.2.2.2  | Closed-cycle Scenario.....  | 204        |
| 6.3      | Summary.....  | 206        |
| <b>7</b> | <b>Project findings and recommendations.....</b>  | <b>208</b> |
| <b>8</b> | <b>Bibliography.....</b>  | <b>212</b> |
